

ARDESIA COLLECTION

Ardesia is a stone with a long architectural tradition gives inspiration to a ceramic surface for natural and elegant contemporary interior design.

Ardesia is the result of the application of two innovative technologies: RealUp® and StrideUp®. With RealUp®, graphics and three-dimensionality achieve an unprecedented synergy: the overall design of the ceramic surface achieves a unique depth and level of detail. StrideUp® is the technology that expands the versatility and functionality of porcelain stoneware to create a new type of surface that has high slip resistance while being soft to the touch and easy to clean at the same time.
