

Wall: Oxidart Black 196x196mm

# OXIDART COLLECTION

The Oxidart Series was created using special techniques which perfectly replicate the textured effects of treated sheet metal on the tile surface .

These 200x200 tiles create a decorative industrial look, and are available in black, copper or patchwork. The Patchwork pattern features the hyper-realistic look of irregular rusting and etching of the metal, underlined by a decorative grid pattern. This Oxidart series exudes an urban industrial character for a refined, elegant contemporary style.
